

Questions & Answers for As Needed Traffic work for Davison TSC

Question 1:

Primary Prequal Classification list requires 'Traffic Signal Operations Studies'. As this is a new MDOT Prequal category, and no firms are listed at this time as holding this prequal, will you consider a proposal from a firm showing it has submitted application to MDOT to gain this prequal?

Answer 1:

We have removed the Traffic Signal Operations Studies prequalification from the RFP.

Question 2:

Per the MDOT Vendor Selection Guidelines, the Primary Prequalification Classifications requested in the RFP must all be held by the prime, not any by qualified subs. Would you consider a proposal that shows the use of a sub for 'Traffic Signal Design', if the prime otherwise held all of the prequal classifications?

Answer 2:

Primes must hold the other prequalifications.
